

Hidden Murphy Wall Bed Series (Soft opening down)

• Pneumatic End Mount Style (Vertical)

Wall Bed (Murphy bed)

Hardware Mechanism

MI-TK560

Features:

1. This wall bed mechanism is of damper which changes lifting strength according to different opening angles. The bed can be easily pulled open to 30 degrees just at the beginning of opening. As wall bed opens down, forces of gravity and damping increase, which makes the wall bed go down steadily and can even stop at whatever positions. Conversely, the wall bed mechanism has the same function when closes.
2. The wall bed mechanism is of a safety lock which locks automatically when bed completely closes.
3. Open the bed: pressing the lock hole on the bed panel can pop out the bed handle. Rotating downward and pulling outward the handle can open wall bed.
4. The wall bed mechanism includes metal bedstead (bed frame) for the mattress.
5. The mechanism is of automatic legs, which avoids opening the legs by hand.
6. No guide bar is required.

Parameter details:

Item No.	MI-TK560-1	MI-TK560-2	MI-TK560-3
Size Inside Bed Cabinet	986x2198x309mm	1286x2198x309mm	1586x2198x309mm
Mattress Size	900x2000x160mm	1200x2000x160mm	1500x2000x160mm
