

Code-It - Electronic Security Handle  
Protect your assets throughout the day

**Code-It**<sup>®</sup>  
Electronic Security Handle

## It Only Takes Seconds

That's how long it takes a thief to steal your personal belongings, confidential information or a laptop. In less time, you can activate Code-It and its automatic locking mechanism to reduce the risk of theft.

## Code-It – The key to indoor security

### Benefits:

- Easy and comfortable use for frequent entering and exiting\*
- Simple operation: 4 to 6 digit code
- Quick and easy installation: securely fixed from the inside of the door, preventing disassembly from the outside
- Compatible with most locking/latching products
- Easily replaces most existing handle types
- Does not require an electrical outlet
- Low-cost maintenance: up to 30,000 entries per pair of batteries

### Features

- For indoor use in office or home
- Locks only from outside, door opens freely from inside the room
- Up to 9 separate access codes for different users
- 2 operating modes:
  - Automatic locking: by just closing the door, with no need for a key
  - Manual locking: with the push of a button
- Indication light for activation, deactivation and battery life

\* For prolonged absence or at the end of a day, additional locking with a manual key is recommended.
